

Laboratory Intern (60-100%) - Molecular Oncology Diagnostics

 **Schlieren (Zurich)**

Join us in advancing precision oncology

At Oncobit, we develop molecular diagnostics that enable better, data-driven cancer treatment decisions. Working at the intersection of clinical diagnostics and pharma services, our team translates cutting-edge science into real impact for patients.

We are looking for a hands-on Laboratory Intern to support our lab operations and gain broad experience in a modern molecular diagnostics environment.

What you'll do

- Perform routine clinical testing and support molecular diagnostic workflows
- Conduct nucleic acid extractions and digital PCR
- Support experiments, including basic data analysis and documentation (IVDR-compliant)
- Assist in pharma service projects (sample processing, assays, documentation)
- Carry out general lab tasks and support infrastructure
- Help with logistics, shipments, and kit manufacturing

What you bring

- Ausbildung as Laborant/in (EFZ) or BSc in Biology (or equivalent)
- Hands-on experience in molecular biology, ideally with exposure to PCR
- Interest in oncology, diagnostics, or applied life sciences
- Careful, structured, and reliable working style
- Comfortable working in a regulated BSL-2 lab environment
- Confident communication in German and English

What we offer

- Entry via internship (60-100%) with potential for long-term opportunities
- Hands-on experience in clinical diagnostics
- Exposure to pharma collaborations and real-world applications
- Insight into lab operations, logistics, and manufacturing
- A collaborative, international, and mission-driven team

Apply now

We'd love to hear from you. Send your CV and motivation letter to:
